RE: Worth Nixon and Plum Creek Libby gravel pit sites

Dear David:

After having inspected the above two gravel pit sites, and having received the necessary signed documents including applications, Plans of Operation and verification of bonding, I have determined that the sites can be mined and the permit and Amendment can be granted. As I said at our meeting in the office of Plum Creek's Jerry Wolcott, Worth Nixon and Plum Creek are authorized to continue mining the sites.

I anticipate that Mr. Nixon's permit and Plum Creek's Amendment to their permit will be granted in a reasonable time when we have had a chance to clean up the paperwork and process the applications. If you need anything further, I will be back in my office on Monday, November 13th.

Thanks again for the opportunity to process these pit permits prior to completion of mining. I appreciate that you were willing to cease further mining until I could evaluate the sites and secure the proper documents and performance bonds. Reclamation of these sites is our main concern and the primary goal of the Opencut Mining Program.

Sincerely,

Rod Samdahl
